
EDUCATION

Bachelor's Degree | Faculty of Information Technology, CTU

2025 - 2028

EXPERIENCE

Founding Engineer | Oscillator Labs s.r.o. | Remote

08.2023 - Present

- Backend and Azure infrastructure development (Bicep/IaC) for Agnes AI, successfully scaled to the first ~100 active users.
- Designing production prompts to eliminate hallucinations and ensure the consistency of LLM outputs.
- Research and implementation of a Computer Vision system for analyzing physiotherapeutic video recordings.

CERTIFICATION

AZ-900 | Microsoft Certified: Azure Fundamentals

08.2024

Foundations of cloud services and Azure architecture.

SKILLS

Backend & Development: Python, Flask, SQL, PostgreSQL, Bash, Git

AI & LLM Engineering: Prompt Engineering, Vector Embeddings, Computer Vision

Cloud & DevOps: Microsoft Azure, Bicep (IaC), Azure Functions, GitHub Actions, Linux

PROJECTS

Homelab & Network Infrastructure

02.2026 - Present

A home server running Proxmox VE paired with a dedicated OPNsense router. Currently designing and 3D printing a custom 10" rack.

Personal Website | GitHub

03.2025 - Present

A personal landing page and a sandbox for testing modern web technologies.

8-Bit Computer

06.2024 - 08.2025

Building a functional 8-bit computer from logic gates on breadboards to gain a deeper understanding of hardware fundamentals.

OTHER

Fluent in Czech and English (B2 level), and currently learning the basics of Italian and Swedish. My main interests include building mechanical watches, 3D printing, and creating custom electronics projects. I gained discipline and endurance during 8 years of competitive cycling, which I later transitioned into sport shooting.
